FOGGING FOR MOSQUITOES TO BE CONDUCTED TOMORROW IN ANTIOCH

–Current conditions indicate higher risk for West Nile virus transmission–

WHAT/WHY: Due to high numbers of adult mosquitoes detected and the associated elevated risk of West Nile Virus, the Contra Costa Mosquito & Vector Control District will be fogging by trucks to control adult mosquitoes.

WHEN: Tuesday, August 28, 2007. Fogging will take place between 8:00 p.m. and 10:00 p.m., weather permitting.

WHERE: Antioch: The area bordered by A Street on the west, Burlington Northern Santa Fe Railroad on the north, Hillcrest Avenue on the east, and Union Pacific Railroad on the south.

TREATMENT: will be made with truck-mounted ultra-low-volume equipment using [Pyrenone 25-5 Public Health Insecticide](#) (pyrethrin) applied at a rate of 0.75 oz/ acre.

ACTION REQUIRED BY RESIDENTS: None. All products used are approved by the Environmental Protection Agency for the use of controlling mosquitoes and protecting public health.

MAPS/INFO: Visit the District's website at www.ccmvcd.dst.ca.us to see maps of areas to be fogged/sprayed, as well as information on all West Nile virus activity/cases in Contra Costa County for 2007.

NOTIFICATION: The District recently introduced an automatic email notification for people wishing to learn about adult mosquito fogging or spraying in the county. Anyone can visit the District's website at www.ccmvcd.dst.ca.us and opt to receive the notifications automatically. Earlier this year, the Contra Costa County sheriff's department announced that they discontinued their telephone notification calls for District adult mosquito spray operations since their reevaluation indicated that it did not meet their emergency criteria.

-More-

The District offers several ways in which people can learn about adult mosquito spray operations. Residents can visit the District website and view the information, opt in for the email notifications, or simply phone the District for a recorded message at (925) 685-9301.

2006: Last year in Contra Costa County, eight people were documented with West Nile virus and two people died.

2007 - TO DATE IN CONTRA COSTA COUNTY: To date in 2007, there have been 16 birds, three chickens, and 25 mosquito samples that have tested positive for West Nile virus.
